Culpable Negligence

It is becoming, to an ever increasing extent, one of the responsibilities of governmental authorities to protect people against themselves, not only for their own sake, but for the sake of others whom, in one way or another, the first named endanger. One of the latest developments in this direction is joint action by the Dominion, Provincial and municipal authorities to lessen the possibility of accidents at level railway crossings. Such crossings are always dangerous, but with the advent of the motor car, and the speed mania of reckless drivers, the death and accident toll has mounted alarmingly.

In nearly one thousand accident cases reported to the Board of Railway Commissioners during the past year, there was danger of loss of life or damage to property because of negligence at highway-railway level crossings. Of these accidents 369 were reported on the lines of the Canadian National system, and railway officials have carefully classified these. It was found that more than forty per cent. of the accidents were caused by some form of downright negligence on the part of the motorist.

Of the huge total of accidents, no less than 325 were cases where vehicles broke or damaged crossing gates which had been lowered; 23 where drivers ignored signals and drove right through gates; 36 cases where drivers passed right ahead under gates which were in process of being raised or lowered; seven cases of driving on to crossings opposite gate which had been lowered; five cases where drivers under the influence of liquor crashed into gates; while three accidents were due to pedestrians climbing over or under gates.

In other words, all these accidents were the result of a wilful disregard of the means of protection provided by the railways. But in their insane desire for speed motorists were responsible for a large number of accidents which were the outcome of what is classified as "inexplicable negligence." Some of the almost incredible performances of careless and reckless drivers are listed as follows:

Fourty-four motorists drove into the sides of moving trains.

Thirty-eight drove into the sides of standing trains.

One driver parked on the railway lines while he had a sleep.

One tried to drive between two railway cars while switching. He was unsuccessful.

Twelve parked on or too near the railway tracks.

Seven went for a drive along the railway tracks—they met express trains.

One driver left his car on the tracks to search for something he had dropped on the road. When he returned there was nothing left of the car.

One driver stopped on the railway tracks to adjust his load.

Eleven found too late that their brakes needed relining.

This amazing record shows that not only are many accidents at crossings due to sheer negligence and in no way excusable, but they also serve to indicate the nature of the problem of "educating" drivers of motor cars guilty of such insane conduct. Warning signs and even physical barriers such as crossing gates are no sure guarantee against accidents due to such carelessness.

There appears to be but two methods of putting an end to such accidents. One is to do away with level highway-crossings altogether by carrying highways either over or under the railway tracks. This is a highly expensive business, and is not possible in a country of such immense distances as Canada. It can be done at crossings in all urban centres and at points where traffic is exceptionally heavy, and to this task the Federal Government through the Board of Railway Commissioners, working in co-operation with Provincial Governments and municipal authorities, has decided to bend its energies, the cost of obliterating these level crossings being distributed among these several governmental bodies.

The second course is to licence all drivers of motor cars and to make it an offence for anyone to drive a car unless he or she has such a licence, and to immediately cancel the licence of any person found guilty of negligence, carelessness, and recklessness in handling a car. Such persons are a danger not only to themselves, but to the public at large, and in the public interest should be denied the right to drive such a potential engine of destruction on the public highways as the modern powerful motor car.

Information Wanted

"I've been congratulating the colonel. He's just been appointed warden of one of the largest prisons," said a guest at the banquet.

"Really?" replied another. "Tell me—for a job like that do you want influence or does one start as a convict and rise from the ranks?"

Pigeon Versus Telegraph

A carrier-pigeon has had a race with the telegraph, and has won.

The other day two messages were sent to the same destination overseas, one by telegraph and one by pigeon.

The gallant little bird arrived first, beating the telegram by ten minutes.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

New Midget Auto

Will Be Sold Through Mail Order Houses For \$200

The New York Times says negotiations are under way for the large scale production of the new "baby" auto which would be sold through the mail order houses for \$200.

The car is the invention of James B. Martin, of Garden City, N.Y.

The feature of the car is that it has no axles in the usual sense of the word, each wheel being independently mounted in the reinforced body. Rubber "aviator cord" is used in the suspension of each wheel instead of a spring.

The new car has a wheel base of sixty inches, compared with 102½ inch wheel base of the smallest car now being produced in the United States. Mr. Martin said his invention will do 50 miles on a gallon of gasoline.

He declared he planned to have it shipped in a weather proof packing case with a hinged door which may be used as a garage.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household cares have worn her thin, the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says: "I have suffered from nervousness and dizzy spells, and the hundred and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Life Of Motor Cars

The average life of an automobile is stated to be seven years, although not many persons run their cars that long. The auto plainly is not in the class with horse-drawn vehicles which it displaced, as regards length of years. The old buggies and cabs frequently were longer-lived than their owners, and their maintenance cost was little more than the price of axle-grease. Montreal Gazette.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Eclectic Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Calgary Aero Club

More Than Fifty Local Fliers Have Graduated Since Last September

With the announcement the other day that three more Calgary airmen had secured pilot's licenses, under the supervision of Inspector H. C. Ingram, Inspector of Civil Aviation for Western Canada, the number of local fliers who have graduated since flying began here last September has more than passed the half century mark, so it was stated by officials of the Calgary Aero Club and the Great Western Airways, Limited.

Noted Speakers Will Be Heard

Will Deliver Addresses At Annual Convention Of Canadian Chamber Of Commerce

Right Hon. L. C. M. S. Amery, Hon. R. B. Bennett and E. W. Beatty will be amongst the speakers to address delegates to the annual convention, Canadian Chamber of Commerce, at Calgary and Edmonton, September 11, 12 and 13. All speakers will conform to the general theme of "Our Canadian Economic Partnership."

Mr. Amery will speak on the British Empire's share in the partnership; Mr. Bennett on confederation as a partnership; and Mr. Beatty on the role of transportation in economic partnership.

Other speakers will include Premier J. E. Brownlee, of Alberta; Hon. S. F. Tolmie, premier of British Columbia; Wm. Butterworth, president of the United States Chamber of Commerce; Sir A. W. Buchanan, owner of the Lethbridge Herald, who will discuss the share which agriculture takes; R. J. Hutchings, president of the Canadian Manufacturers' Association; H. W. Wood, president of the United Farmers of Alberta; Senator Gideon Robertson; John W. Daffoe, editor of the Manitoba Free Press.

"Why do you pay so many visits but never ask anybody to your house?"

"You see, when I pay a visit I can go when I like, but when people visit me, I have to wait until they feel like going."

A woman of Perth, Australia, has left her entire estate of \$10,000 to reduce Great Britain's national debt.

Receives New Honor

King George Confers Barony On Sir Robert Baden-Powell

King George has conferred a barony on Sir Robert Baden-Powell entitling him to sit in the House of Lords.

Lieutenant-General Sir Robert Baden-Powell founded the organization of Boy Scouts and Girl Guides in 1908, after he had had a distinguished military career in India, Afghanistan and South Africa. He received various citations and decorations for his war services and many others came to him for his work with the Boy Scouts.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Eclectic Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

An adding machine was built in 1915 and exhibited at the Panama Exposition that had a capacity of 40 columns or within one unit of ten duodecillions.

Stop Pain

Minard's may be used internally or externally to ease pain in all parts of body.

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

HUNTER-MARTIN & CO., REGINA, SASK.

High Standard Maintained By Medical Profession Necessary To Retain Confidence of Public

(By Dr. Gordon Bates, General Secretary, Canadian Social Hygiene Council)

Who is a doctor? How is that the governments and peoples of every civilized nation in the world single out one group of men—and owdays, of women too—and say to them: "You are doctors, and in your hands we place our social and individual health. You and you alone may use the hallowed title, 'Doctor of Medicine,' and by virtue of that title, heal the sick and preserve the well."

Perhaps the best answer to that question, is this: Imagine, if you can, the condition that would exist if the medical profession were not so recognized. Suppose that any man who had the laudable ambition to heal his fellow-men of their ills—could without any supervision call himself "Doctor" and begin cutting people up and dosing them with potations of his own concoction. What an epidemic of horrible deaths there would be! How quickly the public's present profound respect for the title "Doctor" would be changed to the deepest distrust!

What then, is the medical profession, and how does it maintain the high standard that this great public confidence demands? Let us consider what the Province of Ontario expects of a man who would practise medicine. Its requirements are typical of those of the rest of Canada.

To become a medical student, one must first pass his honor matriculation. That takes five years. After that, he must spend another six years at a recognized medical school.

It is hard to adequately suggest, in a sketchy article of this nature, the vast scope of a modern medical curriculum. The neophyte must learn physics, chemistry, biology, physiology, pharmacology, anatomy, histology (involving an understanding of the microscopic structure of the body).

From these basic studies, all of which, where they touch the human being, deal merely with the normal, the student then proceeds to pathology, the study of sickness, in its different aspects, pathological chemistry, bacteriology and immunology, medicine and surgery in all their branches, preventive medicine hygiene.

It is still harder for the reader to appreciate the vast historical background, the great wealth and richness of meaning of all of these terms; of the tremendous accumulation of knowledge that a would-be doctor must painstakingly acquire. And when he has spent six long years acquiring it, it is then customary for him to spend one or more often two years as an interne in a hospital. So that a youth of nineteen who finishes his honor matric and starts to "go through for a doctor" knows that he will be about 28 before he starts earning anything. And even then, it will take him another five years before he begins to earn more than enough for the ordinary necessities of life.

Which means that a doctor doesn't begin to earn anything to speak of, as a rule, till he is thirty-three! In the meantime, he has spent from six to eight years learning his profession, he has had to master all the old, as well as all the new branches of medicine, he has passed a number of stiff examinations,—made extra stiff in order to keep an already crowded profession from becoming over-crowded. (And from this extraordinary severity of examination, the general public is obviously the greatest gainer, since only the more intelligent, reliable students succeed in passing.)

He has spent an absolute minimum of \$1,000 a year for six years, including \$150 tuition, \$100 for books and equipment, which leaves very little for room, board, clothing and incidentals, to say nothing of amusements.

But in passing through those years of test, and trial, and hard work, he has become legitimate heir to all the tested medical knowledge that mankind has ever acquired and saved. The wisdom of long-dead leeches has been poured into him, and he has become greater than any of them, greater by virtue of his greater knowledge, a scientist, able to work by degrees from the known to the unknown.

And for the privileges that society accords the physician it expects, and is almost invariably accorded, a ten-fold return. There is no other division of mankind, with the possible exception of clergymen, that gives away, gratis, more of its time, energy and knowledge than do the doctors.

A doctor does an enormous amount of work for which he is not paid. Common humanity demands that he answer any serious call made upon him, at any hour of the day or night, even if he knows that the patient cannot pay. In a way this is unjust. No one expects the keeper of a grocery store to give away his goods, even though there may be people starving for lack of them. Yet a doctor is expected to do just that, and in most cases he does.

In making this concession to the race generally, the doctor becomes the greatest giver of charity in the community. "Noblesse oblige" is to him no idle, elegant phrase, and it is indisputable that the profession bears, collectively, a great burden of healing the indigent, which belongs rightly to the state, just as the feeding of the starving is becoming recognized as a state responsibility.

And so, within the limitations of this short article, I have endeavored to establish the following facts: That every doctor belongs to a profession whose object above all other things is to heal the sick and to prevent sickness; a profession that is constantly improving itself, a profession that has produced men like Koch, Jenner, and Pasteur, whose discoveries have saved the lives of hundreds of thousands, and will save unborn hundreds of millions, a profession whose pride is in efficiency, and whose record is one of service that has been to a larger degree unselfish than that of any other mundane calling.

Failed To Work

The gentleman's dinner check was three dollars. The gentleman gave the waiter a ten-dollar bill. The waiter brought back the change on a little tray—some bills, some silver, and a small napkin, folded. The gentleman left a tip and was about to depart when he was inspired to count the change. It was a dollar short. He summoned the waiter, who began to conduct a search, which ended with the discovery of two half dollars in the fold of the napkin. This greatly surprised both the gentleman and the waiter.

Losses From Insects

The Dominion Entomologist, Mr. Arthur Gibson, estimates that in the aggregate insects cost Canada well over \$100,000,000 annually. This is the loss to field crops and to it must be added the loss to forest and shade trees, stored products, etc. While these latter losses are difficult to estimate they easily average over \$50,000,000 a year.

How Not To Keep Idle

Mayor T. H. Tyson, of Denmark, Tenn., is a busy man. He serves as notary, justice of the peace, road supervisor of this section, farmer, miller, substitute rural mail carrier, a physician of sorts, and as a sideline sells tombstones. He is also chairman of the Sons of Rest.

"Please sir, I have just run over your mother-in-law."
"How much reward are you claiming?"—Gutierrez, Madrid.

W. N. U. 1798

Railway Officials Receive Promotion

Important Changes In Personnel Of Operating Department On the Canadian National

Changes of major importance in the personnel of the executive of the operating department of the Canadian National Railways in Western Canada took place on August first, according to a circular issued by Sir Henry Thornton, president, and S. J. Hungerford, operating vice-president of the company at Montreal. The changes are as follows:

A. E. Warren, general manager, Central Region, Toronto, to be vice-president of the Western Region, with headquarters at Winnipeg.

W. A. Kingsland, general manager, Western Region, Winnipeg, to be general manager, Central Region, with headquarters at Toronto.

Col. T. A. Hiam to be assistant to the President, with headquarters at Vancouver; to represent the executive in British Columbia, and collaborate with all departments in matters affecting the company's interests.

A. A. Tisdale, assistant to the general manager, Western Region, Winnipeg, to be general manager western region, with headquarters at Winnipeg.

J. R. Cameron, assistant general manager, Western Region, Vancouver, will, at his own request, retire on superannuation after many years of service.

B. T. Chappell, general superintendent of the Saskatchewan District, with headquarters at Saskatoon, to be general superintendent of the British Columbia District, with headquarters at Vancouver.

C. Forrester, superintendent at London, Ontario, to be general superintendent of the Saskatchewan District, with headquarters at Saskatoon.

The appointment of a vice-president in charge of the western region of the company has been under advisement by general headquarters for some time, and it is a step which meets the general desire of the business men of the west. Mr. A. E. Warren needs no introduction to the west. Most of his railroading experience has been acquired west of the great lakes, and following amalgamation in 1922, he was general manager of the Western Region until his transfer to Toronto in 1926, as general manager of the Central Region.

The transfer of Mr. W. A. Kingsland to Toronto as general manager of the Central Region, will be generally regretted, even though the change places him in charge of probably the heaviest traffic section of

Investigation By Scientists Is Under Way To Breed New Hardy Fruits For the North

the system. During the time he has been in the west, he has succeeded in gaining the confidence and friendship of the business men on all parts of the line as well as the loyalty of the entire personnel under his control. Under his guidance the lines of the western region have shown splendid financial results during the past three years, the returns for the last year being the highest in history.

The new general manager of the western region, M. A. A. Tisdale, was born in Mount Vernon, Ont., in 1874, and has been in the service of the Grand Trunk and Canadian National Railways since 1890, having worked his way by sheer ability from an apprentice in the shops at Hamilton, to the position he now holds. He has been in the west since 1909, at which time he was superintendent for the Grand Trunk Pacific at Fort William, from which post he was transferred to Winnipeg as assistant to the vice-president and general manager in 1916.

In the retirement of J. R. Cameron, the company loses the service of one of its oldest and most valuable officers. Mr. Cameron joined the Canadian National Railways as a conductor in 1889, and steadily worked upward through the operating department to the position he is relinquishing at his own request.

Like most of the other executive officers of the company, B. T. Campbell also won his way up the ladder. He has been in the service of the company since 1895, and has seen service in various capacities in Winnipeg, Port Arthur, Rainy River, North Battleford, Vancouver and Saskatoon.

Large Co-Operative Turnover

Total Sales Of Agencies In Saskatchewan Reaches High Figures

Total sales of all the larger co-operative agencies in Saskatchewan amounted during 1928 to \$176,640,000. The volume of business transacted by producer co-operatives in Saskatchewan last year were: Saskatchewan Wheat Producers, Limited, \$160,000,000; Co-Operative Creameries, Ltd., \$5,000,000; Livestock Producers, Ltd., \$4,918,000; Co-Op. Trading Associations, \$3,852,000; Municipal Hail Association, \$1,856,000; Poultry Producers, Limited, \$553,000; Registered Seed Growers, Ltd., \$281,000; Canadian Co-Op. Wool Growers, Ltd., Saskatchewan Branch, \$180,000, a grand total of \$176,640,000.

Investigation by American scientists is under way to breed new hardy fruits which may grow in Canada's northland. This was disclosed at The Pas, Man., by K. A. Ryerson in charge of the office of foreign plant importation, United States Department of Agriculture.

Mr. Ryerson arrived in town to lead a party up the Hudson Bay line to select plants and fruits for scientific investigation. He will be accompanied by Prof. W. H. Alderman, head of the Horticultural Division of the University of Minnesota, and W. R. Leslie, in charge of the Dominion Experimental Farm at Morden.

The party expects to be gone a month and will take Churchill in their itinerary.

Mr. Ryerson explained the importance of the trip to the fruit growers of the middle western states.

"The climate of that area is such that only hardy fruits and berries can be grown," he explained. "The winters are very cold and the falls are early. To meet these conditions new fruits must be bred by cross pollination and hybridizing. The ideal plant to introduce in the north would be one that can survive the winters of the edge of the Barren Lands, and yet produce fruit," he asserted. "This trip will only be one of investigation and we expect to return here next summer and get a larger number of specimens to use in our pollination work."

Surveyors Discover Submarine Mountains

Two New Ranges Have Been Located By Echo

Surveyors of the ocean's bed have discovered two new mountain ranges which they have accurately mapped and measured says an article in Pearson's Weekly. All the credit for the discovery is really due to that elusive subject—the echo. Shells that explode on striking a solid substance were fired at the sea bed below. By calculating the time that it took the echo of the explosion to penetrate from the bottom of the sea, the scientists on the vessel above realized that they had discovered a range of mountains capped, not by snow, but hundreds of fathoms of ocean. One of these ranges lies about one hundred miles off the coast of Ecuador and is considerably over five thousand feet in height. The other range of mountains has been discovered some distance to the north of Juan Fernandez, and rises to a height of nearly ten thousand feet!

Manitoba Poultry Marketing

When the Manitoba Co-Operative Poultry Marketing Association, Ltd., began operation in 1922, the first year's shipments totalled five cars of dressed poultry. Last year the association shipped 72 cars of dressed poultry, 10 cars of live poultry, and 135 cars of eggs to markets in Eastern Canada and the United States. The organization now has a membership of over 12,000 farmers and their wives throughout the province of Manitoba.

To Teach In Arctic

Miss Bessie Quirt, is going to Shingle Point at the mouth of the Mackenzie River on the Arctic ocean as a teacher in the first residential school to be opened for Eskimos in Canada. She will be one of a party to leave Toronto. Miss Quirt's home is in Orillia. She expects to stay for five years in the Arctic.

USE BOTH ARMS

Inspector Davitt of the Provincial Police has issued a series of warnings to the public. Drivers' licenses are to be checked up carefully and must be properly signed with the signature of the holders. In this connection, he warns people never to leave licenses in their cars. A B.C. man has his car stolen. His license unsigned was in the car. The thief signed the license and going to a bank used the license as a means of identification in cashing a cheque for several hundred dollars.

The one armed driver is likely to be discouraged henceforth. There will also be a check-up of people driving three and four in the front seat. Already in Toronto, several prosecutions on these grounds have been made and convictions secured.

The mere fact that we have an old age pension act is no reason for going wild about it, and rushing madly to make paupers of the people. The greatest care should be exercised in the administration of this act, for it undoubtedly can do wonderful things in making the last days of many a deserving pensioner happy and contented, but it can also, if abused, not only pauperize its recipients but impoverish the taxpayer.—Ex.

THE MILKMAN'S HORSE

Unless and until man invents a habit-forming automobile that starts, steers and stops itself at the word of its driver from the sidewalk, milkmen will continue to use horses on their morning house-to-house deliveries.

From tests, made to determine the relative utility of automobiles and horses in delivering milk, it appears that the horse wins out largely because it needs so little attention from the driver. In fact, experiments were made which showed that in a journey of three hours and eleven minutes, delivering to more than 200 customers, the milkman spent nine and a half minutes in handling his horse. Inasmuch as the animals come to know their routes, they stop and start at a word from the driver, who can rearrange his bottles and leave the moving wagon to place milk on doorsteps, meeting the wagon several doors farther on. An automobile or truck virtually necessitates an extra man to drive it.

There are other reasons why the horse is preferred by the milk distributor. These have been carefully tested and tabulated, such as relative ability to get over bad roads, the climbing of hills, the elimination of waste motion and year-round utility.

This is welcome news to the horse breeder but hardly so to city folk who do not get up with the milkman. Until some inventor devises an automobile that responds to "giddyap" and "whoa" and learns from habit to start and stop of its own accord, the sedate pounding of iron-shod hoofs on hard pavements will continue to disturb early morning slumbers.

Alberta is singularly blessed with national parks. They constitute by far the largest area of national parks in any province of Canada. To the thoughtless individual who considers a park area waste area because it is withdrawn from commercialism, the action of the Government of the Province of Alberta in appointing a com-

LOCAL & GENERAL

Mr. Roger Barrett was a business visitor to Calgary Monday.

Wanted—Waitress for American Cafe, Didsbury. 34

Miss Marie Cameron was a visitor at the home of Mr. and Mrs. W. G. Liesemer last week.

Mr. and Mrs. Cecil Adshead and family left Friday morning by motor on holiday bent to B.C.

Miss Dorothy Ranton is relieving for two weeks at the Olds' Telephone Office.

Mrs. Maddocks of Stavelly was a visitor at the home of her daughter, Mrs. W. H. Chamberlin, last week.

Mr. and Mrs. H. E. Pearson and family left by motor Friday morning last for a trip up the Banff Windermere highway.

Mr. and Mrs. Lawrence Meyer and family who have been visiting in Ontario and Nebraska returned home Saturday evening last.

Mr. and Mrs. J. W. Phillipson and family accompanied by Ernie Fletcher motored to Sylvan Lake on Sunday.

Mrs. A. C. Fisher and Miss V. Sexsmith returned home Thursday from a two weeks' vacation spent at Sylvan Lake.

Mr. and Mrs. Jim Rupp returned by motor on Friday last from Los Angeles where they have been visiting relatives the past month.

Mrs. A. G. Studer and Misses Winnie Studer and Beatrice Kendrick returned to Sylvan Lake on Saturday last.

Mr. Liphardt, who has been engaged in the business of watch repairing in town for the past while, has removed to Turner Valley where he will carry on his trade.

Mr. and Mrs. Tom Wyman and sons Ward and Bennie and Miss Annie Pelechaty were visitors to Sylvan Lake on Sunday and incidentally took in the lacrosse game.

Mr. W. H. Nicholas, Mr. and Mrs. C. A. Nicholas and daughter Alberta who have been visiting their parents Mr. and Mrs. Fred Imm and relatives for the past two months, left for their home in Emporia, Kansas, Wednesday. On their return trip they will visit Banff, Yellowstone Park, Casper, Wyo., Colorado Springs, and other southern points.

WHAT OTHER EDITORS ARE SAYING**CANADA FOR CANADIANS**

The harvesters' situation this year has proven the folly of allowing Canada to be flooded with non-English speaking immigrants. More than a million of these have been allowed to come into Canada in the last three years and lower the wage markets, for they care little about the wages they receive so that they can learn the ways of the country, while Canadian citizens born and raised in Canada wait in vain for work in the harvest fields and have had to return to their homes in the various provinces, worse off than when they came west.

These foreigners not only lowered the harvest wages but also the industrial wages.

Why should Canada's native sons and daughters have to be pushed to one side to allow the onward march of this ever-increasing host?

In Canada there is almost too much of the spirit of tolerance which allows these foreign immigrants altogether too free a passage into our country, and decidedly too free a hand when they are within the boundaries of what makes one of the most wonderful countries in the world—the Dominion of Canada.—Taber Times.

mission to survey the entire province and report on sites suitable for the location of public parks will not only come as a surprise, it will cause a serious consideration of the entire park problem in areas and districts where parks are at present non-existent or appreciated but little.

Mr. Arthur Reiber has accepted the position of teacher at the Hammer school east of Olds.

Mr. Oliver Bird of Edmonton spent a few days in town this week visiting friends.

Miss Mary Little of Airdrie was a visitor with Miss Evelyn Liesemer last week.

The Calgary-Edmonton lacrosse game at Sylvan Lake, Sunday, attracted many Didsburyites to Alberta's popular summer resort.

Mr. and Mrs. W. J. Scheidt returned home Thursday evening last from Oregon from a visit with relatives.

See Ramon Navarro with Renee Adoree in "The Pagan", at the Opera House, Didsbury, Wednesday, Aug. 28. Actually filmed in the wonder isles of the South Seas. Navarro's best since "Ben Hur."

Misses Norma Holmes of Vulcan, E. O'Hara and Florence Reiber of Calgary and Harold Reiber of Edmonton were week end visitors at the home of Mr. and Mrs. H. M. Reiber.

The following local pupils of Mrs. (Rev.) H. E. Roppel were successful at the recent Toronto Conservatory of Music examinations conducted at Olds local centre: Primary Grade, Piano: Ruby Traub; Element. Gr. Piano: Alton Mack; Introductory Gr. Piano: Tena McLean, Mildred McDonald, Hope Roppel, Winnie Adshead, Norma Sanderman, Mary Luft.

'Tis harvest time and many binders are in the fields cutting and binding into sheaves the precious grain. Barley and rye fields are all in stook, and a start has been made on several wheatfields, which will be sure the latter part of this week. Although wheat filling is baffling the farmer, from fair to good yields are expected.

Mountain View Notes

The Mountain View W.I. met at the country home of Mrs. Jas. Sheils on Thursday, August 15th.

Mrs. Boyce, our constituency convener, was present, and gave a talk on W.I. work and of the coming conference to be held in Carstairs, Sept. 4th.

As Mrs. Dawson, convener for "Canadian Industries," could not be present, Miss Beatrice Sheils led a very interesting discussion on the subject.

The September meeting of the Institute will be held in Community Hall on Thursday, 19th.

The annual School Fair will be held on Wednesday, September 25 at the Community Hall.

Prize Winners of I.O.D.E. Competition

The \$10 prize money offered by the local I.O.D.E. to the first three students in each of the four years of the Didsbury High School for the highest percentage in the June, 1929, Department of Education examinations, follows:

EVANGELICAL NOTES

The annual Children's Day service will be held at Westcott next Sunday in the evening at 8 o'clock. A good program suitable for the occasion is anticipated. In addition to local talent, there will be assistance from Didsbury. Everybody is most cordially invited.

In the pastor's absence from the pulpit in Didsbury, while at Westcott next Sunday evening, the pulpit in Didsbury will be supplied. Particulars will be announced on Sunday morning.

Mr. and Mrs. A. Brusso and son returned Wednesday from a two weeks' motor trip through the Canadian Rockies.

Mr. W. McFarquhar left on Sunday for a two weeks' holiday to be spent in and around Calgary.

THE FORD CAR FUEL SYSTEM

- A—Filler Cap.
- B—Filter spout screen filters gas and prevents splashing through filler opening.
- C—Gas gauge.
- D—Fuel line main shut off valve.
- E—Gas filter.
- F—Carburetor Connection.

Simple—Safe— and Dependable

THE Ford car fuel system is simple because it is direct. Gravity flow does away with forced feed. A short feed line with a minimum of elbows and connections is easy to service and eliminates approximately 100 parts required by the vacuum tank or fuel pump system.

The nine gallon tank is so placed that it is well protected from front or rear end collision. Any overflow runs off on the ground with no serious results, since the only point of possible spark contact is the rear end of the exhaust. Three screens instead of one, as in most fuel systems, prevent foreign matter reaching the tank. A solid steel dash separates the Ford gas tank from the engine.

The gas gauge on the dash of the Ford car is controlled by a simple float as shown in diagram, being more direct, simple and accurate than any other type. Another point of driving convenience made possible by the gravity flow system is the ease with which the tank may be filled, while the driver supervises the operation without moving from behind the wheel.

Drive it Yourself—there is no Better Test

Ford Car Features

Choice of colours
35 to 65 miles an hour
40-horse power engine
Full balloon tires
Fully enclosed six-brake system
4 Houdaille hydraulic shock absorbers

Guards Against Gas Explosion

New Invention Works Danger Signal and Fans Away Fumes

After the numerous gas explosions which have occurred recently in London, it was only to be expected that something would be invented to make this possibility of explosion a thing of the past. And now we hear of a little device which does away with any danger of gas escapes.

This wonderful little invention is not very impressive to look at, being just a little cylinder shaped, instrument only about seven inches high, which can be fitted wherever there is a possibility of leaking. But it only needs the very minutest escape to set this gallant little sentinel in action, when it works a danger signal, gets in touch with the nearest telephone exchange, and informs those in power of the exact locality of the escape.

Not content with this warning, the trustworthy little cylinder sets in motion an electric fan to keep away the fumes!

What more could one ask?

Edison Competition

Boy From Washington State Is Selected To Follow In Footsteps Of Inventor

Wilbur B. Huston, a youth from Port Madison, Wash., was named the winner of the Thomas A. Edison competition for choice of a protegee and follower in the footsteps of the inventor.

The forty-nine contestants—one from each state and the District of Columbia—were lined up on the lawn of the Edison home in Llewellyn Park as the announcement was made by Dr. S. W. Stratton, president of the Massachusetts Institute of Technology, who was chairman of the committee of judges.

Dr. Stratton was high in his praise of the boys, who participated in a gruelling examination on subjects ranging from morals and ethics to science.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

Ancient artists obtained their pigments chiefly from the rocks and earth.

The barking of a dog can be heard at a height of four miles.

Discover New Ocean Trough

Sixth Greatest Submarine Depth Is Found Near Japan

Discovery of a vast ocean trough near Japan, more than five miles deep in one place and ranking as the sixth greatest submarine depth known to man, is welcomed by scientists as shedding increased light on the earthquake history of the region.

Centers of earthquake activity are found in the neighborhood of ocean deeps. Fissures generally indicate weaknesses in the earth's crust that will give way under conditions of stress and strain.

The trough was found by scientists aboard the "Carnegie," non-magnetic ship of the Carnegie Institute, of Washington, as they were cruising due north from Guam to Yokohama, Japan.

It measured 28,380 feet in depth for a distance of nine miles.

All of the six greatest deeps known to man lie in the Pacific ocean. The five that are greater than the newly discovered trough are Mindanao, near the Philippines, 34,220 feet; Tuscara, near Japan, 32,000 feet; Mariana, off Guam, 31,000 feet; Kermadec, or Aldrich deep, 300 miles northeast of New Zealand, 31,000 feet, and Solomon deep, off Solomon Islands, 30,000 feet.

The greatest depth in the Atlantic ocean lies off Porto Rico and measures 27,900 feet.

Takakkaw Falls Park

The stream which culminates in the famous Takakkaw Falls, in Yoho National Park, British Columbia, is fed by the melting waters of the Waputik icefield, which lies upon the summit of the Great Divide. Flowing down the mountain for over half a mile it reaches the precipice that walls the east side of the Yoho Valley. Here it takes an initial leap of 150 feet over the edge, then, gathering itself together, falls in a glorious curtain 1,000 feet down the face of the cliff, and finally tumbles in a magnificent cascade of 500 feet into Yoho River.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

The Chinese land covers one-quarter of Asia, from the Pamir mountains to the Pacific, and from Siberia to India.

Minard's Liniment for Summer Colds.

It is the business of a business man to see that his employees attend to his business.

UNIVERSITY OF MANITOBA WINNIPEG

Co-Operative Wool Growers

Heavy Consignments Expected This Year From All the Provinces

"This is going to be a heavy consignment year for wool from all provinces," said H. J. Tisdale, of the Canadian Co-Operative Wool Growers, upon his return from an extensive tour of the west. After a month in the principal sheep raising areas Mr. Tisdale estimated that the total of western shipments to the Wool Growers this year will amount to around 2,800,000 pounds divided as follows:—British Columbia, 400,000; Alberta, 1,500,000; Saskatchewan, 600,000, and Manitoba 300,000 pounds.

Recipe For a Delicious Uncooked Salad Dressing

To add tastiness to the salads and green vegetables which are both cheap and healthful at present, the following salad dressing recipe is much prized:

- 2 eggs beaten until light.
- 1 teaspoonful salt.
- 1 teaspoonful mustard.
- 1 cup vinegar.
- 1 can Eagle Brand Milk.

beat vigorously all the ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken. This dressing will keep for weeks.

Quebec Had Snow In June

Five different places reported snow in the month of June. The Gouin dam in the Lake St. Peter region headed the list with a two-inch fall during the 30 days of the month. Thetford Mines ranged to the other extreme, for, in addition to recording traces of snow, it also registered the hottest day of the entire month, the mercury soaring to 96 degrees on June 20.

WINDOLITE

The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Marcus, the famous Broadway producer, takes a party of four to Blackie Joe's New York night club. Al Stone, Blackie's chief comedian and singing waiter, is desperately in love with Molly, the ballad singer, but she scornfully rejects him. Then she goes to the Marcus table and tries to ingratiate herself with the great producer. In a despairing effort to touch Molly's heart Al goes on the floor and sings a love ballad he has written for her. The song is a sensation and Marcus calls for Al and offers to buy it. Meanwhile Molly has made up to Al and the latter refuses to sell the song unless Molly is allowed to sing it as a headliner in a Marcus revue. Marcus consents. Grace, the cigarette girl, who is deeply in love with Al, is in the background.

CHAPTER VIII.

As Al heard Marcus's words he turned quickly and beamed on Molly. He realized he had won—Marcus would not only take the song, but he would make Molly a headliner. Tears of excitement and gratitude filled Molly's eyes. After all, she was not a woman of stone; she did appreciate the gallant stand her singing waiter had made in her behalf.

Now Al became aware of a clatter behind him, in front, and all around. The crowd saw him at Marcus's table and refused to be cheated of its encore. The applause was deafening, the customers were pounding on the tables, and their voices came in monotonous, insistent, rising chants, "We want Al, we want Al, we want Al!"

Al rose and looked around. "You'll have to give them another," said Marcus, smiling. "Have you any more songs ready?"

"Yes, I have others," Al replied. Then he saw Blackie approaching. "Can't you give them something else?"

Felt Tired and Miserable

"I took Lydia E. Pinkham's Vegetable Compound for miserable and tired feelings and it gave me strength to do my work. My nerves are better and I feel well and strong and have a good appetite. I sleep well and am in pretty good spirits and able to work every day now. I recommend the Vegetable Compound, and you may use this letter as a testimonial."—Miss Delvena Wallace, Union Street, North Devon, New Brunswick.

Lydia E. Pinkham's Vegetable Compound

W. N. U. 1798

Al nodded and Blackie advanced to the center of the floor.

"Lad-les and gentlemen" — his powerful voice filled the room — "Mr. Al Stone, the world's premier singing waiter, is going to entertain us with another number of his own com-pos-i-tion in response to the insistent demand. I wish to thank you in behalf of Mr. Stone and the club for the rousing reception you have given him."

Again Al advanced to the piano, drew from his pocket a number of ballads, and selected "I've Got a Rainbow Round My Shoulder." Could he put this one over too? Yes, he was sure he could — so quickly is self-confidence born as soon as success is once achieved. And, true to his feeling, he swept through the song to another triumphant conclusion, while Molly's eyes remained fixed on him in rapturous adoration.

Now the night was ended at Blackie Joe's—Marcus and his party had gone and the last of the other customers had vanished too. Waiters were hurriedly piling chairs on tables, scrub-women appeared with buckets and mops, lights were dimmed.

In a tiny dressing room at the back of the building, Grace, the cigarette girl, had taken the tray from her shoulder, balanced her accounts for the evening and slipped into simple and inexpensive blue serge dress.

Generally Grace had a good natural color, but this morning the pale sunlight, slanting through her dressing room window, revealed her face as dead white. So she put on more rouge than usual, to accentuate the brave front she felt she must assume. Yet as she pulled her tight-fitting little blue velvet hat down over her dark hair and slipped into her coat, these words were beating in her brain:

"He's in love with Molly—and he means to marry her!"

Over and over again the words sounded, like a dirge. And they seemed to take on rhythm, the rhythm of "Always," the love ballad Al had sung to Molly.

Grace heard footsteps in the hallway and turned to confront Blackie Joe. There was good old stout Blackie, gazing at her with kindly eyes. Finally he said:

"How do you feel, little one?"

"Oh—so-so."

She couldn't say she felt splendid; she didn't have the strength to say it, and she knew Blackie wouldn't believe it.

"Listen, Grace," suggested Blackie, "don't take things so hard. I know how you feel toward Al; don't you think I've been watching you and sympathizing with you? But you're beating your head against a stone wall."

"I know it," Grace tried desperately to keep her lips firm. "I've thought things all out—I realized tonight there wasn't a chance for me. But I can't stop loving him just because he loves Molly."

"You can't now, at this moment, maybe," answered Blackie, "but you'll be able to, soon. You're only a kid, and you'll find someone else. I know—I was once a kid myself. With me it was on with a new one and off with the old one every month or two."

"That may be true of you," said Grace, wearily, "but I think I know myself. I'll bet you I never love anyone but Al—I know I won't."

Blackie laughed, came over and patted her on the head.

"But don't you tell Al about that!" continued Grace, with passionate emphasis. "I don't want him to know how I feel toward him—it would spoil his happiness. And, above all things, I want Al to be happy! He's been wonderful to me—why, he's the

best, kindest, best-looking man in the world. Promise me you'll keep mum about me, Blackie?"

"Not a word, kid," said Blackie reassuringly.

"I know how he feels towards me," Grace went on. "I'm just like a younger sister to him. I wish him all the happiness in the world—I know he'll be leaving us. I've lost out forever and—that's that."

"Don't be too sure," Blackie remonstrated.

"What do you mean?"

"I don't mean nothin' except—well, forever's a long time."

Grace rose and moved listlessly toward the door.

"Thanks for taking an interest, Blackie. See you tonight. So long."

"So long," Blackie looked after the sagging little figure that was usually so lithe and vibrant with vitality. He shook his head sadly.

Grace, passing through the serpentine corridors, heard voices—the voices of Al and Molly. They were talking in Molly's dressing room. She did not mean to listen, yet she stopped as she heard Al say enthusiastically:

"We can't lose, Molly. Marcus will sign us up tomorrow and we'll move over to the bright lights and the big money. Then we'll get married. That will be the happiest day of my life, darling!"

"Yes," came Molly's eager voice, "we'll get married and we'll go to the very top. Al, I've always known you had it in you. When I heard you sing tonight I was sure!"

The faint flicker of an unbelieving smile crossed Grace's face, but she made no sound. Then came Molly's voice again:

"We'll leave this dirty hole cold—right away—tomorrow."

At this, Al paused. Then he remonstrated.

"So soon, Molly? That wouldn't be fair to Blackie. He's done a lot for you and me. It's true I thought of quitting tonight, but that was because I believed you didn't love me. And I couldn't stand the thought of staying. Now it's different; let's give Blackie some notice, be square with him the way he's been with us. After all, he's had faith in both of us."

"Oh, all right," agreed Molly grudgingly, "but I hate this tough place."

Suddenly Grace ran in the other direction, through the corridors, across the deserted cabaret room, down the dark, shabby steps to the sunlit street. Her heart was thumping madly and she wanted to get as far as possible from their voices. Her woman's intuition made her fear for Al's future with Molly; something in the girl's insensitive attitude and words horrified her.

She hurried along the narrow streets toward her lodging house in the Village, several blocks away. Her thoughts were full of Al and her love for him; she realized that if she didn't reach home quickly she would burst out crying on the street.

When she stood in her bleak, shabby, lodging house bedroom, and confronted her reflection in a mirror, she cried passionately:

"That girl's no good! She'll never make him happy! And, oh, I love him so! I would have worked so hard to help him!"

(To Be Continued.)

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

Okanagan Valley Fruit

Fruit conditions throughout the Okanagan Valley are promising. There has been some drought injury to apples and some hail damage, but on the whole the yield is expected to be a satisfactory one. Onions also are making a good yield.

Spanish applause consists of a peculiar hiss.

POWER

Trustworthiness makes reputation! Since the earliest gas engines turned their wheels, Eveready Dry Batteries have been known for their dependable ignition work.

Sealed in metal cases against damp or rain, Eveready Hot-Shots will stand any amount of exposure or rough handling without injury. Buy them for gas engine, tractor or marine motor ignition. Look for the name Eveready on each battery case. If it's not an Eveready, it's not a genuine Hot-Shot.

Little Helps For This Week

"Whoso trusteth in the Lord, happy is he.—Proverbs xvi. 20.

The child leans on its parent's breast. Leaves there its cares and is at rest; The bird sits singing by its nest, And tells aloud

His trust in God, and so is blest 'Neath every cloud.

The heart that trusts forever sings, And feels as light as it had wings; A well of peace within it springs, Come good or ill. What-e'er today, tomorrow brings, It is His will.

He who believes that God's will always must be done prays not when this or that event arises, but ever prays that, more and more, he may come into harmony with it. And out of this constant prayer of the soul that desires not gifts from, but communion with the Giver, there comes a sense of trust.—Francis B. Hornbrooke.

As Itemized

The expert had been called in when the factory motor broke down. He took one look, made two taps with a hammer and started it in perfect order. The owner was indignant to get a bill for \$50, and demanded an itemized account. He got this:

Tapping with hammer.....\$ 1.00
Knowing where to tap 49.00

Total\$50.00

A Giant At Ten

Although only ten years old, Robert Wadlow, Racine, Wisconsin, has reached the stature of a well-developed man. He is 6 feet 10 inches tall and weighs 250 pounds. Special shoes built for him, size 25, were made from five square feet of leather. Physicians say he will grow to be nine feet tall.

The Man For the Job

The Department Manager: We'll have to fire that new salesman. He's asleep most of the time.

The General Manager: No, don't fire him. Send him up to the clock section. We can use him there demonstrating alarm clocks on him.

Early oil wells at Baku were scooped out by hand.

NEVER wait to see if a headache will "wear off." Why suffer when there's always Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve such pain. The medical profession pronounces it without effect on the heart, so use it as often as it can spare you any pain. Every druggist always has genuine Aspirin tablets for the prompt relief of a headache, colds, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

ASPIRIN
Aspirin is a Trademark Registered in Canada

"In Selling Position"

Alberta Wheat Pool members should appreciate what it means to the Central Selling Agency to have Pool wheat in "a selling position."

To make the best sales Pool wheat should be in a position where it is instantly available, and where long and troublesome delays are not incurred.

When Pool wheat is in Pool elevators the Selling Agency can depend upon it being directed wherever it is wanted. For that reason, if for no other, Pool wheat should be delivered to Pool elevators.

Besides this, Pool elevators give Pool members an assurance of fair treatment to an extent never known in the days when there was no Wheat Pool.

You can best aid your Selling Agency and your own elevator system by delivering your wheat to Pool elevators.

400 Pool Agents Gather In Conference

Over 400 agents of Alberta Pool Elevators were assembled in Calgary a week ago at a 4-day convention, and every phase of the Pool Elevator business was discussed. H. W. Wood, Chairman of the Board of Directors of the Alberta Wheat Pool in his opening remarks strongly recommended that the agents would best serve the Pool's interests by dealing with the members with the utmost fairness. He pointed out there was no incentive under the Pool system of elevator operation for any agent to deal unfairly with any member. The Pool elevator system is not operated for profit, Mr. Wood declared, but solely on the basis of service to the membership.

Following the cut-off on the 15th of July when the 1928-29 Pool was closed, the Alberta Wheat Pool is taking court action against Pool members who failed to deliver all the wheat they raised during that crop year. The Pool contract calls for the delivery of all wheat raised by each Pool member within the confines of the province and the stipulated penalty for infractions is 25 cents a bushel. While the great bulk of the members are loyal, there are some who have apparently overlooked their legal obligations, and the organization is taking energetic action against the latter. It is realized by the Pool that court action is undesirable but at the same time it is not fair to the bulk of the membership for a comparatively small number to act disloyally and flout their contract.

R. D. Purdy announced at the convention that the Alberta Wheat Pool now owns 435 elevators spread over the length and breadth of this province. This is an increase of approximately 135 over the number operated last year, and makes the Alberta Wheat Pool easily the largest elevator organization in Alberta. The Pool now has facilities to handle approximately 90 per cent of all Pool wheat.

The Alberta Wheat Pool will pay farm storage to Pool members who hold their wheat on their farms until Monday, December 2nd, the amount being 2 cents per bushel. This decision was recently arrived at by the Directors of the organization. Last year the Pool paid farm storage on a different plan, 1 cent per bushel being paid on wheat held until December 1st, and an additional 1 cent for wheat held on farms until March 1st.

Pimples, Blotches Quickly Vanish

Under This Penetrating Antiseptic
You can have a clear, smooth, velvety skin. If you will only try the pure cooling liquid D.D.D. It soothes the tissues and drives away pimples, blotches and other blemishes. ITCHING STOPS INSTANTLY. This healing wash penetrates the skin leaving no stain upon the surface. A 35c bottle proves its merit or your druggist gives your money back. D.D.D. gives skin health. (Use only D.D.D. Soap.)
